

### **ROUND THE LAKE**

#### VENTOURO

LIFE IN MOTION

Heading out towards acres of lush green Waikato farmland and geothermal steam fields along Poihipi Road . From there it's onto State Highway 32 where you'll need to be prepared for plenty of undulations, particularly Waihaha Hill and its false summit. You'll be spoilt for choice with, breathtaking views across Lake Taupō after the notorious grind up Waihi Hill. Rolling into Turangi and onto SH1 all that stands between you and the finish line is the grueling Hatepe Hill!

#### YOUR TRAINING PLAN

This training plan is designed to help you get to the start line physically prepared for the challenges ahead.

HERE ARE A FEW TIPS FOR USING THIS GUIDE

• Customize the workouts to fit your schedule. Shorten the workouts if necessary or swap workouts throughout the week to fit into your life.

 Consistency is key. Even if you can't complete all the rides, stay focused on riding consistently, and don't play catch up.

> Try and find people to ride with on your longer rides. This is not only a great way to make the time pass but also it is important to practice riding in groups.

Remember you WILL have some bad days. This is ok!

Be safe and use lights when it is dark or low light

### The Start

CYCLE CHALLENGE

**ROUND THE LAKE** 

Its time to get back on the bike!

This phase is all about getting comfortable on the bike. This can be helped by ensuring you're feeling well. Aim for 500-700m of fluid per hour, and have something to eat for any ride that is over an hour.

Ride intensities:

Easy – Conversation pace. Intensity should be keeping you warm but you should be able to maintain a conversation throughout.
Short hills – Hills that take up to a maximum of 5mins to climb (Can be as short as 2-3mins. Hit these hills with a purpose!
Long hills – Climbs that last longer than 5mins. Make sure you ride these at an intensity that you can sustain for the entire length of

- Long hills – Climbs that last longer than 5mins. Make sure you ride these at an inte the climb

Endurance - A Steady to varied pace. You should be able to converse at this pace, not easily on the climbs

## The Build

This is where the hard work begins! Nutrition is hugely important for fuel and recovery. Be sure to watch out for tips from Tom Shand as to how you can achieve roughly 60 grams of carbs + 500-700ml of fluid an hour.

You may struggle to feel like you're noticing much progress in this phase, as we keep moving the goal posts each week. Trust in the process,  $r_{\tau}$  and if you are short on time, the long ride on the weekend is the most important session

# The Final

Cycling doesn't get any easier, you just go faster! It's important that you are getting sufficient recovery. If you are starting to struggle it could be your body telling you to take a day off. Always better to take one off to recover then the alternative, which is often several days off with illness or injury.

As event week approaches and the event gets closer its time to recover. Remember to look after yourself, hydrate, eat well and get plenty of sleep. You've put in all the work over the past 16 weeks, now get out there and smash your goal. Best of luck from the team at Ventouro.
